Education

Bachelor of Computer Applications

GLA University

Sept 2022 – May 2025

CGPA : 8.43

Secondary Education (10+2)

MD Jain Public School

Aug 2019 – July 2022

Percentage : 83.8

High School (10th)

MD Jain Public School

April 2019 – March 2020

Percentage :73

Experience

Chetu India Private Ltd.

Software Engineer – ASP.NET Developer

Nov 2024 – Present

- Developed and maintained web applications using ASP.NET Core MVC, C#, and Entity Framework, ensuring scalable and maintainable code across multiple modules.
 - Integrated RESTful APIs using asp.net core Web APIs to enhance product functionality and user experience in enterprise-grade applications.
 - Collaborated with cross-functional teams to implement end-to-end features, including user authentication using Identity Framework, role-based authorization, and JWT token-based APIs.
-

Projects

Task Management System

Technologies Used: C#, ASP.NET Core, MVC, ASP.NET Core Identity, MS SQL Server, Admin Lite Theme

Project Overview:

Developed a web-based Task Management System to facilitate task creation, assignment, tracking, and reporting, with secure role-based access for Admins and Users.

Key Responsibilities & Features:

- Leveraged ASP.NET Core Identity for secure user authentication, authorization, and role management (Admin/User).
- Designed and implemented a clean, maintainable architecture using ASP.NET Core MVC.
- Developed full CRUD operations for tasks and user management.
- Utilized MS SQL Server for reliable and scalable data persistence.
- Integrated Admin Lite Theme to build a responsive and modern user interface.
- Enabled Admins to create users, assign tasks, and monitor progress via reports.
- Allowed Users to view assigned tasks and submit their progress reports.
- Implemented role-based access control to restrict access and safeguard administrative functionalities.

The BabySproutes (Ecommerce Web Application)

[Website Link](#)

Technologies Used: C#, ASP.NET Core, MVC, ASP.NET Core Identity, MS SQL Server, Admin Lite Theme, ThemeWagon Karma Theme.

Project Overview:

- Developed a full-featured e-commerce web application using ASP.NET Core MVC, Entity Framework Core, and MS SQL Server, facilitating seamless online shopping experiences.
 - Implemented role-based authentication using ASP.NET Identity for Customers and Super Admins, allowing secure access and management of products, categories, and orders.
 - Designed dynamic, responsive UI components using jQuery, AJAX, Bootstrap, and Razor Pages to enhance interactivity and user experience.
 - Built real-time order tracking, and shopping cart functionality using jQuery and JavaScript on the client side.
 - Developed an admin dashboard for managing inventory, orders, and categories, with data-driven decision-making features and backend validations.
-

Technical Skills

- Languages:** C#, SQL, HTML, CSS, JavaScript.

- **Frameworks / Libraries:** MVC in ASP.NET, MVC in ASP.NET Core, Identity Framework, jQuery, and Angular.
 - **Web Development:** Web API, JWT Token.
 - **Databases:** MS SQL.
 - **Developer Tools:** VS Code, Visual Studio, Swagger.
 - **Operating System:** Windows.
 - **Soft Skills:** Leadership, Problem-Solving, Collaborative.
-

Certifications

- Certification for participant in EVOLUTE'23 under the GLA University with department of Computer Engineering and Applications.
 - Participated in coding Contest by BCA O Crates and got 7th rank.
 - Certification in Basic C# by Hacker Rank.
-
